Portfolio | GitHub

Columbus, OH

Project Experience

Planmark

- Link to the Github repository
- Led a team of four junior developers in creating an application to help tourists find local events
- Responsible for wireframing the project, as well as creating and updating the HTML
- Responsible for integrating several APIs into the application
- Utilized Bootstrap for styling the application

The Movie Database

- Link to the Github repository
- Helped lead a team of four junior developers in creating an application to review movies
- Responsible for creating RESTful API routes for the application
- Utilized the handlebars.npm package to stylize requested output
- Instrumental in debugging code that led to errors in CSS styling

Employee Tracker

- Link to the Github repository
- Created an application to assist employers in creating and maintaining a database of employees and departments
- Created the project using Node.js and MySQL
- Utilized several NPM packages to improve the visual aesthetic of the application
